

FC 1150 Accessory Kit - Chain Clamping Device

OVERVIEW

The FC 1150 enables to clamp the our facing machines on the outer part of the flange. This allows the complete machining of the bolt holes working surface.

Thanks to a simple and functional design, the chain is mounted within a few minutes, in any position and by a sole technician.

Compatible with the following Machines:

- TU 1100

TECHNICAL DESCRIPTION

Clamping Diameter: Ø 430 – 1150 MM

Min. Thickness of the flange: 30mm

Chain adjustment.

Jaws angular.

COMPONENTS

- 4 x Thread Steel Jaws
- 1 x Angular Graduated Disc
- 4 x Graduated Steel Rulers with cursor
- 1 x Chain with screwed links, length 5000mm
- Principle Chain Adjuster Tool
- 8 Secondary Adjusters
- 1 Set of Keys

TU 1100 PORTABLE MACHINING UNIT WITH FC 1150 KIT
